

PI Math Club
is pleased to present a talk by

Dr. Stephen Gillam
IPFW Department of Physics

“Updates on the IPFW Undergraduate Astronomical Observatory”

Dr. Stephen Gillam has taught Physics and Astronomy at IPFW for the last 4 1/2 years. His research interest is Globular Star Clusters in the Milky Way and other galaxies. He is currently working with Dr. Catherine Pilachowski at IU on the origin and evolution of stars in globular clusters in the Andromeda Galaxy. He is passionate about stellar photometry (i.e. measuring the colors and intensities of stars). The more stars the better! Steve will talk about the computer-controlled observatory nearing completion on the IPFW campus.

Wednesday, October 5, 2016
at noon
in KT 216

Free pizza and pop following the talk for PI Math Club members.
(\$1 for non-members)
Open to all interested students.
