

**PI Math Club**

is celebrating **Pi Day** with a talk by

**Prof. Doug Townsend**

IPFW Department of Mathematical Sciences

The number  $\pi$  has a long and fascinating history. It is used frequently in mathematics, statistics, the sciences, and engineering, etc. It also has a fascinating history in the state of Indiana. I will talk about a bill introduced to the Indiana state legislature in 1897 which purported to define the “true” value of  $\pi$ . I will also mention a resolution introduced in the US House of Representatives that designated March 14 as “Pi Day”. There will also be a **Pi Day Sudoku competition** and, of course, lots of PIES!!!

**Wednesday, March 14, 2018**

**at noon**

**in room KT 216**

Free pie and pop for PI Math Club members following the talk.

(\$1 for non-members)

Open to all interested.
