

PI Math Club  
is pleased to present a talk by

**Dr. Billy Rhoades**

Professor Emeritus, Department of Mathematics,  
Indiana University - Bloomington

The title of his talk is

**“Euler Was Right!”**

Euler regarded power series as infinite polynomials, and therefore performed some operations that we would question. My talk focuses on one such situation, and describes the mathematics, developed over a century later, which verified his calculation.

**Wednesday, January 25**

at noon

in KT 216

**Free pizza and pop following the talk!**

Open to all interested students.
