

PI Math Club
and Pi Mu Epsilon
invite you to

A celebration of Pi and Pie
on the Pi day of the century -
the only one good to four decimal places
on the calendar in your lifetime!

March 14 is celebrated as Pi Day (π rounded to four decimal places is 3.1416). It is appropriate for the **PI** math club and the **Pi** Mu Epsilon math honor society to host a celebration of Pi on March 14 starting at noon in KT 216. There will be a variety of activities and **pie will be available to all in attendance.**

Do you find some math tricky? Hear a brief presentation about when Mr. T. I. Record tried to trick the Indiana General Assembly to legislate the value of Pi to be 3.2, and find out from Visiting Prof. David Benko how you can estimate the value of Pi using dice. Then Dylan Rudy, an IPFW graduate student will attempt to trick you with some mathematical card tricks!

Monday, March 14

Starting at noon

KT 216

Open to all interested students.
