

PI Math Club is proud to present

Dr. Matthew Walsh
IPFW

as he presents a talk titled

Harmony and compromise: the math behind musical scales

We will explore the numerical underpinnings of harmony: why do some notes sound good together, and others don't? Along the way we'll compare several different musical scales in the history of Western music theory and examine the choices and compromises made. No particular background in mathematics or music is expected.

Monday, Nov. 22 at noon in KT 216

Free pizza and pop following the talk!

Open to all interested students.
