## CASE

## CASES

### NOMINATIVE: SUBJECT

✧Andrew✧ likes ketchup.

### GENITIVE: POSSESSION

✧Courtney's✧ hair is brown.

### DATIVE: INDIRECT OBJECT

You gave a CD ✧to Ashley✧.

### ACCUSATIVE: DIRECT OBJECT

You saw ✧Matthew✧ in the halls.

### ABLATIVE: ---[Many different uses]---

André surprises Sue ✧with flowers✧.  
Barney and Anne live ✧in New York✧.  
Julian walks back ✧from the bus stop✧.

**CASE**  
Different word forms (Flāvia vs. Flāviam) are called "cases."  
The case of a word reveals its grammatical role in the sentence.

## NUMBER

plūma  
nominative singular

plūmae  
nominative plural

The **ending** of a noun  
reveals its case and number.

Every noun has a set of  
**singular** case forms and a set  
of **plural** case forms.

## GENDER

### GENDER

Masculine    Feminine    Neuter

#### RELATED MEANING & GENDER

puella - girl → feminine  
puer - boy → masculine

The gender of a noun  
is sometimes but  
not always related  
to the meaning  
of the noun.

#### UNRELATED MEANING & GENDER

vīcus - village → masculine  
urbs - city → feminine  
oppidum - town → neuter

#### IDENTIFYING A NOUN'S GENDER

Some genders are obvious  
(*puer* - boy → masculine),  
but in many cases, you must  
look in the *dictionary* to find  
the gender of a noun.

Typical noun  
dictionary entries

stella, stellae, **f.** (star)

astrum, atri, **n.** (star)

#### GENDER MATTERS!

Different genders use  
slightly *different endings*,  
so you may misunderstand  
a noun's form if you do  
not know its gender.

puerum (boy)

↓  
masculine

↓  
accusative singular

verbum (word)

↓  
neuter

↓  
nominative or accusative  
singular

## DECLENSION

### DECLENSION

"Declension" is simply a word that means  
"Noun Type."

There are 5 different types of nouns in the Latin language,  
each of which has its own set of case endings.

### IDENTIFYING A NOUN'S DECLENSION

Every declension has a  
genitive singular form  
that is different from the  
genitive singular forms  
of other declensions.

Look at a noun's dictionary  
entry to find its genitive  
singular form.

stella, stellae, f. (star)  
astrum, astri, n. (star)

### GENITIVE SINGULAR ENDINGS

- ae → 1st Declension
- ī → 2nd Declension
- is → 3rd Declension
- ūs → 4th Declension
- eī → 5th Declension

### DECLENSION MATTERS!

It will be difficult to  
interpret noun endings  
correctly if you do not  
know the noun's  
declension.

### SECOND DECLENSION

	SING.	PL.
Nom.	puer	puerī
Gen.	puerī	puerōrum
Dat.	puerō	puerīs
Acc.	puerum	puerōs
Abl.	puerō	puerīs

puerum:  
Second  
Declension  
↓  
accusative  
singular

### THIRD DECLENSION

	SING.	PL.
Nom.	pater	patrēs
Gen.	patris	patrum
Dat.	patrī	patribus
Acc.	patrem	patrēs
Abl.	patre	patribus

patrum:  
Third  
Declension  
↓  
genitive  
plural

## DICTIONARY ENTRY AND STEM

Use genitive to identify the **declension** of the noun.

Use genitive to identify the **stem** of the noun.

### GENITIVE SINGULAR ENDINGS

- ae → 1st Declension
- ī → 2nd Declension
- is → 3rd Declension
- ūs → 4th Declension
- eī → 5th Declension

### PLURAL-ONLY NOUNS

Some nouns only use plural forms, so their dictionary entries give:

nom. pl., gen. pl., gender, meaning

dēliciae, dēliciārum, f. (sweetheart)  
castra, castrōrum, n. (battle camp)

## STEM

Basic **foundation** of a noun - case endings are added to it.

Remove **genitive singular** ending to identify the stem of a noun.

### DICTIONARY ENTRY

### STEM

agricola, agricol <b>ae</b> , m. (farmer)	→ agricol-
ager, agr <b>i</b> , m. (field)	→ agr-
