

Tips on How to Upgrade to OS 5.4.0

for the TI-84 Plus CE Calculator, TI Connect™ CE, and TI-Smartview™ CE Software

Need help? Call 1-800 TI-CARES and they can walk you through it.

Check the OS by choosing **1:About** from the MEM menu. Press **[2nd][MEM]** (above **[+]** key),
The latest CE OS version released is v5.4.0. Go to education.ti.com/84ceupdate to get the latest release,
which will guide you through how to update using the CE Bundle and TI Connect CE (free).
Each release will contain an OS update and possibly several App updates.

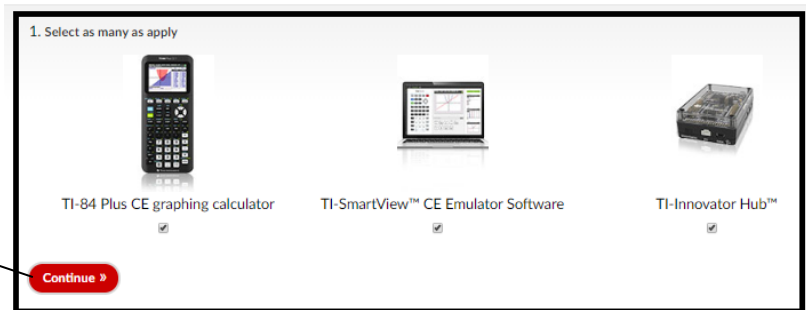

Please save off all favorite CE files to your computer using TI Connect CE prior to updates.

Use the CE Bundle! It will check the OS and all Apps so everything is up to date. The CE Bundle will also update Image Vars back to the original 5 pre-loaded images.

While you can send an OS and any App unit to unit, all versions must all be the latest for the particular OS for the particular App for Apps to launch. App version numbers may not match the latest OS version if the particular App was not updated during the latest release. Great news! The CE Bundle and TI Connect CE take care of all the checking so you do not have to check!

1. Go to education.ti.com/84ceupdate
2. Select what you want to update, then click on **Continue**.

3. Download any necessary files:

- TI Connect™ CE
- TI-84 Plus CE OS and Apps Bundle
- TI-Smartview™ CE Software
- TI-Innovator™ Hub Update Software

4. First update your TI Connect™ CE to the latest release.

5. Connect your TI-84 Plus CE Calculator to your computer with the black USB cable.

6. If needed, use TI Connect™ CE to save any calculator files to your computer prior to this update. After the CE Bundle transfer completes, you can drag your calculator files back to the TI-84 Plus CE Calculator.

7. Drag the CE Bundle to TI Connect CE v 5.4 and follow the prompts. This will update your calculator to v 5.4 OS, all latest TI Apps (except TI-TestGuard CE) and original pre-loaded Image Vars Image1-Image5.

8. With TI Connect CE you can update multiple connected TI-84 Plus CEs at once with a powered USB hub connected to your computer if needed.

9. Next update your TI-SmartView CE v 5.4, which will automatically make sure your CE emulator is OS 5.4 and all TI Apps on the emulator are their latest version. (The CE Bundle is only for the TI-84 Plus CE calculator.)
