

Lab Practical Instructions

Your instructor will assign you a seat for this test.

Turn off your cell phone or other electronic devices.

Put your name and 3-digit ID on the test.

Please print or handwrite legibly.

Circle your starting number. (Only one student starts at number 1.)

All questions refer to the tip of the pointer or pin. Large areas have tags which do not need pointers.

“Specific structure” refers to part of the whole.

You have 2 minutes per station. There is no return to any station at the end, even once papers are turned in.

Please keep your paper folded and in front of you at all times.

You may carefully handle bones and models.

Your instructor will show you the route around the room, will let you know when your grade will be posted, and will answer questions.

Reminder: Each question has its own tag with the same number.

FIRST, READ the question.

NEXT, FIND the tag with the same number.

THEN, ANSWER the question.
