

Immunology Research/Paper/PowerPoint Topics

TCR

Bcl-2

Fas Ligand & Fas Ligand receptor

Catalytic antibodies

Autoimmune Diseases

SLE

Arthritis

Graves' disease

Multiple sclerosis

ETC....

Oral allergies

Various types

Cancer vaccines

Minor MHC antigens

Specific diseases with certain HLA (MHC) haplotypes

Specific immunosuppressive therapies

Neuroendocrine regulation of immune system (exciting new area of research)

Probably lots of different topics

Tumor necrosis factor

Interferon

SCID research

Superantigens

T_H1 and T_H2 cells and regulation

IL-12

IL-4

Allograft rejection and thymus education

DiGeorge syndrome

Cancer immunotherapy

Co-stimulatory signals

Enhancement of APC activity

LAK cells
Monoclonal antibodies

Salivary antibodies
