

General Power Function Shapes

Activity 11.1

$$y = kx^n \text{ where } k = 1 \text{ and } n > 0$$

$$y = x^n, n \text{ even}$$

General
Shape:

Through: $(1, \underline{\quad}), (-1, \underline{\quad})$

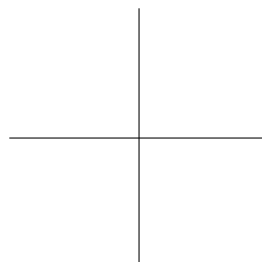

Symmetry: $\underline{\hspace{2cm}}$

Domain: $\underline{\hspace{2cm}}$ Range: $\underline{\hspace{2cm}}$

As $x \rightarrow -\infty, y \rightarrow \boxed{}$ and as $x \rightarrow \infty, y \rightarrow \boxed{}$

$$y = x^n, n \text{ odd}$$

General
Shape:

Through: $(1, \underline{\quad}), (-1, \underline{\quad})$

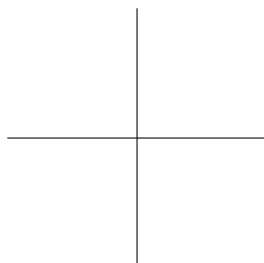

Symmetry: $\underline{\hspace{2cm}}$

Domain: $\underline{\hspace{2cm}}$ Range: $\underline{\hspace{2cm}}$

As $x \rightarrow -\infty, y \rightarrow \boxed{}$ and as $x \rightarrow \infty, y \rightarrow \boxed{}$

$$y = \frac{1}{x^n} = x^{-n}, n \text{ even}$$

General
Shape:

Through: $(1, \underline{\quad}), (-1, \underline{\quad})$

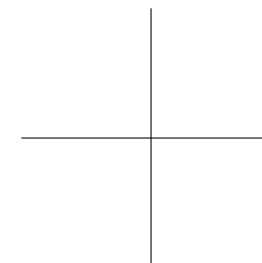

Symmetry: $\underline{\hspace{2cm}}$

Domain: $\underline{\hspace{2cm}}$ Range: $\underline{\hspace{2cm}}$

As $x \rightarrow -\infty, y \rightarrow \boxed{}$ and as $x \rightarrow \infty, y \rightarrow \boxed{}$

$$y = \frac{1}{x^n} = x^{-n}, n \text{ odd}$$

General
Shape:

Through: $(1, \underline{\quad}), (-1, \underline{\quad})$

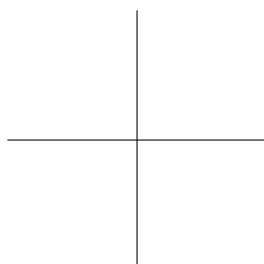

Symmetry: $\underline{\hspace{2cm}}$

Domain: $\underline{\hspace{2cm}}$ Range: $\underline{\hspace{2cm}}$

As $x \rightarrow -\infty, y \rightarrow \boxed{}$ and as $x \rightarrow \infty, y \rightarrow \boxed{}$

$$y = x^{\frac{1}{n}}, n \text{ even}$$

General
Shape:

Through: $(1, \underline{\quad})$

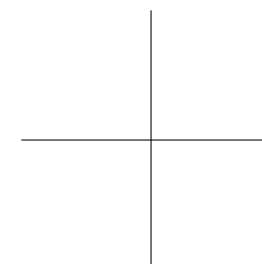

Symmetry: $\underline{\hspace{2cm}}$

Domain: $\underline{\hspace{2cm}}$ Range: $\underline{\hspace{2cm}}$

As $x \rightarrow \infty, y \rightarrow \boxed{}$

$$y = x^{\frac{1}{n}}, n \text{ odd}$$

General
Shape:

Through: $(1, \underline{\quad}), (-1, \underline{\quad})$

Symmetry: $\underline{\hspace{2cm}}$

Domain: $\underline{\hspace{2cm}}$ Range: $\underline{\hspace{2cm}}$

As $x \rightarrow -\infty, y \rightarrow \boxed{}$ and as $x \rightarrow \infty, y \rightarrow \boxed{}$
