

## Bug on a Circular Track

Suppose a bug travels along the path of a circle.  
We know that the distance from A to B is  $x$  units.

If the bug walks counterclockwise from A to C, express the distance the bug walks in terms of  $x$ .  
What angle was spanned during the bug's trip?

1.

$m\widehat{ABC} =$  \_\_\_\_\_  
What angle was spanned? \_\_\_\_\_°

2.

$m\widehat{ABC} =$  \_\_\_\_\_  
What angle was spanned? \_\_\_\_\_°

3.

$m\widehat{AC} =$  \_\_\_\_\_  
What angle was spanned? \_\_\_\_\_°

4.

$m\widehat{ABC} =$  \_\_\_\_\_  
What angle was spanned? \_\_\_\_\_°

5.

$m\widehat{ABC} =$  \_\_\_\_\_  
What angle was spanned? \_\_\_\_\_°

Need more practice? Try the following. (Key is on Brightspace.)

6.

$$m\widehat{AC} = \underline{\hspace{2cm}}$$

What angle was spanned?  $\underline{\hspace{2cm}}^\circ$

7.

$$m\widehat{AC} = \underline{\hspace{2cm}}$$

What angle was spanned?  $\underline{\hspace{2cm}}^\circ$

8.

$$m\widehat{AC} = \underline{\hspace{2cm}}$$

What angle was spanned?  $\underline{\hspace{2cm}}^\circ$

9.

$$m\widehat{ABC} = \underline{\hspace{2cm}}$$

What angle was spanned?  $\underline{\hspace{2cm}}^\circ$

10.

$$m\widehat{AC} = \underline{\hspace{2cm}}$$

What angle was spanned?  $\underline{\hspace{2cm}}^\circ$

11.

$$m\widehat{AC} = \underline{\hspace{2cm}}$$

What angle was spanned?  $\underline{\hspace{2cm}}^\circ$

12.

$$m\widehat{AC} = \underline{\hspace{2cm}}$$

What angle was spanned?  $\underline{\hspace{2cm}}^\circ$

13.

$$m\widehat{ABC} = \underline{\hspace{2cm}}$$

What angle was spanned?  $\underline{\hspace{2cm}}^\circ$

14.

$$m\widehat{AC} = \underline{\hspace{2cm}}$$

What angle was spanned?  $\underline{\hspace{2cm}}^\circ$
