

Classification of  $\int_1^{\infty} \frac{1}{x^p} dx$ .

Write “ $< \infty$ ” or “ $= \infty$ ” after each improper integral. Plot the values of  $p$  on the number line for which  $\int_1^{\infty} \frac{1}{x^p} dx < \infty$

Example:  $p = -2$   
 $\int_1^{\infty} \frac{1}{x^{-2}} dx$

$p = -1$   
 $\int_1^{\infty} \frac{1}{x^{-1}} dx$

$p = -0.5$   
 $\int_1^{\infty} \frac{1}{x^{-0.5}} dx$

$p = 0$   
 $\int_1^{\infty} \frac{1}{x^0} dx$

$p = 0.5$   
 $\int_1^{\infty} \frac{1}{x^{0.5}} dx$

$p = 1$   
 $\int_1^{\infty} \frac{1}{x^1} dx$

$p = 2$   
 $\int_1^{\infty} \frac{1}{x^2} dx$

$y = \frac{1}{x^{0.5}}$  ‘hugs’ its  
 \_\_\_\_\_  
 asymptote

$y = \frac{1}{x}$  ‘hugs’  
 neither of its  
 asymptotes.  
 It is symmetric  
 about the line  
 \_\_\_\_\_.

$y = \frac{1}{x^2}$  ‘hugs’ its  
 \_\_\_\_\_  
 asymptote

Classification of  $\int_0^1 \frac{1}{x^p} dx$ .

Write " $< \infty$ " or " $= \infty$ " after each improper integral. Plot the values of  $p$  on the number line for which  $\int_0^1 \frac{1}{x^p} dx < \infty$

Example:  $p = -2$   
 $\int_0^1 \frac{1}{x^{-2}} dx$

$p = -1$   
 $\int_0^1 \frac{1}{x^{-1}} dx$

$p = -0.5$   
 $\int_0^1 \frac{1}{x^{-0.5}} dx$

$p = 0$   
 $\int_0^1 \frac{1}{x^0} dx$

$p = 0.5$   
 $\int_0^1 \frac{1}{x^{0.5}} dx$

$p = 1$   
 $\int_0^1 \frac{1}{x^1} dx$

$p = 2$   
 $\int_0^1 \frac{1}{x^2} dx$

$y = \frac{1}{x^{0.5}}$  'hugs' its  
 \_\_\_\_\_  
 asymptote

$y = \frac{1}{x}$  'hugs'  
 neither of its  
 asymptotes.  
 It is symmetric  
 about the line  
 \_\_\_\_\_.

$y = \frac{1}{x^2}$  'hugs' its  
 \_\_\_\_\_  
 asymptote
